

THE GLEICHEN CALL

VOLUME XXIX NO. 35

GLEICHEN, ALBERTA, WEDNESDAY NOVEMBER 11, 1936

SUBSCRIPTION \$2.00 PER YEAR

FAIR SIZED CROWD ATTEND LAST FIGHT CARD

Only a fair sized crowd attended the boxing show staged by the hockey club last Thursday night in the Community Hall. No doubt the below zero weather had something to do with keeping down the attendance. Although there were no knock-downs until the main bout, the crowd got a good run for their money. The fans were rather quiet and did very little rooting for one boxer or the other, especially was the silence pronounced in the last bout. All evening the fight-strove desperately to land a haymaker, and no doubt this added much to the tension of the crowd. There was an exception to this and that was in the bout between Willie Catter and the manager of Bantley.

The first bout between Buster Rouché and _____ resulted in a good draw. By the time the bout was over both were bleeding. Both, absorbed a lot of punishment in the first round. Rouché, who had a good left jab, as each tried to finish the fight. The sixth saw Buster's opponent cornered twice and gruggy with Rouché landing blow after blow but could not bring his man down.

The second bout was billed for Jack Riley of Cluny vs. Willie Catter of Gleichen. The former did not show up so the manager of Bantley took his place. This manager is a man who is quite grey and one wondered if he could go the six rounds. He soon demonstrated he could box and gave Willie plenty to think about when he chose to attack. The fight developed into a comedy. The white man covered his face and Willie rained punch after punch on the well guarded face. In fact he punched himself weary one in a while the white man opened up then Willie looked foolish. The crowd roared with laughter. The decision went to Willie, which met with the crowd's approval.

The third bout between Kid Kleser of Saskatoon and Pat Moran of Calgary was another draw. Both tried hard for a knock out but boxing cautiously that the bout seemed slow. Neither was aggressive. It was in the third round that Charlie Smith of Gleichen took on Kleser but illness prevented him doing so. If Charlie had been in the ring there would have been some action.

The main attraction between Lust and Bentley, in the 150 pound class, was won by Lust in the 10th round. This was a heavy hitting brawling affair both trying to finish the fight in a few minutes. Shortly after the fight began Bentley found himself hanging on the ropes and the referee telling off the seconds. At the count of three he got away from the ropes and before Lust could cross the ring and attack Bentley went to his knees and took the count of eight. The second saw Lust the aggressor. In the third Bentley began to bleed from the left ear. At the end of the fifth both fighters continued fighting after the gong sounded not hearing it, until it changed several times. During the sixth Bentley almost had victory in his grasp when he floored Lust for the count of nine. Lust got to his feet unsteadily and rushed into a clinch, hung on while Referee Currie tried to separate them. If Bentley had jerked himself loose during these precious seconds, instead of standing still, he might have finished the fight then and there. A few seconds later the gong sounded.

Lust seemed to be worried and in trouble during the seventh, he missed frequently. Bentley was unable to follow up the advantage he had gained. Lust got into difficulty in the eighth when he was cornered but weathered the storm. In the ninth Lust opened a bad cut over Bentley's left eye, which bled freely and interfered with his vision. Midway in the tenth saw the finish when Referee Currie stopped the show to save Bentley from further punishment and awarded the bout to Lust.

Announcer, Sam Moss. Judges, Lt.-Col. Lewis and F. W. Pearson. Referee, Bert Currie. Time-keepers, W. McConnell and A. Wilson.

COMING EVENTS

Nov. 14-Jr. W. A. St. Andrew's Church tea, needle work, home cooking in Legion Hall.

News Items of Local Interest

The auction sale of goods donated to the hockey club proved to be a wonderful success. Saturday. The sale took place on the main street of the town. The hockey club wish to thank all those who donated goods or made purchases at the sale.

The members of St. Andrew's Church are getting ready to celebrate the 50th anniversary of the opening of the church, on Sunday November 29th. On this date it is hoped to have several prominent church men present.

The east bunch are going strong with their car parties so early in the season. A very pleasant evening was spent at the home of Mrs. C. Rouché when around 22 persons were present.

Whist was played by all. The lucky prize winners were: Mrs. J. A. McArthur ladies first, fancy ladies; ladies body, Barbara Day, pitcher; gent's first, Mr. McKeever, pair dress socks; Men's body, Mr. E. Etheridge, tie. A lovely lunch was served at midnight, after which some of the gentlemen sat down to enjoy themselves playing cards.

Mrs. Pat Mahoney was hostess at the November meeting of the W. A. of the United Church. Despite the cold weather and the prevalent sickness the attendance was good. Arrangements were made for a sewing meeting to be held at the home of Mrs. C. R. McIntyre, in preparation for the Christmas bazaar on December 5th. The meeting will take place on Friday, November 13th. Further arrangements were made for a Show or Tea to be held at the home of Mrs. James Black on Wednesday, November 18th.

Over three hundred people attended the annual Tombola and dance, sponsored by the Catholic Ladies. Aid in Meadowbrook Hall. An orchestra from Strathmore was in attendance. Miss Mary Gatrath picked the lucky

PROTECT YOUR HARD EARNED SAVINGS

In Alberta and throughout Canada, life insurance policy holders and beneficiaries should realize the menace to their own and the national welfare that lies in extreme legislation.

These policy holders represent 50 percent of the electors—federal and provincial. Through the institution of life insurance, they have, so pooled their resources that their collective interests can withstand attacks that would bring financial disaster to the individual.

Despite war, epidemic, panic and depression, life insurance has met every policy obligation promptly and in full. Despite the financial disturbance for the past six years, it has distributed, and continues to distribute, to its policy holders and beneficiaries, over \$500,000 every working day.

Seventy-five per cent of this money has been, and continues to be, paid to living policyholders; the balance to the beneficiaries.

Life insurance is the greatest co-operative business in Canada. No one doubts its strength and stability. No one questions the prudent and intelligent direction of its affairs.

It is the guardians of the hard-earned savings of 3,500,000 men and women in all walks of life.

Today there are forces in Canada that menace the welfare of these people. These forces would penalize their savings and impair their investment through legislation which cancels public and private debts—regardless of the debtor's ability to pay—and which tends to destroy the ownership of public and private property.

The interests of life insurance policy holders and beneficiaries—as of all other citizens whose savings are invested in one form or another in Canada—demand that promises to pay be observed when the debtor is able to pay; that hard-earned savings which safeguard the homes and families of the Dominion be protected from unjust legislation.

A woodpecker sat on a knotty limb; his head was red and his temper grim; for the wood was out of whack

ickets from a box, which was shuffled by Mr. E. Menard. Joe Gutman was the winner of the five dollars, and the bed-throw was won by Miss Lucy Merton; while the foot-stool went to Miss Maureen Young and the fountain pen to Miss Gladys Ferguson, all local people.

THE WORLD OF WHEAT

(By H. C. L. Strang, Director "Crop Testing Plan.")

The 250 million bushels of wheat which Canada hopes to export annually has to compete for markets of the world with a vast quantity of other foodstuffs.

It is calculated that the 2,000 million people in the world consume each year in round numbers foodstuffs as follows: potatoes 8,000 million bushels, wheat 1,500 million, rice 5,000 million, rye, millet and spelt together 1,500 million.

In addition 10,500 million bushels of corn, barley, oats and mixed grains are fed to livestock and produce the equivalent of about 2,000 million bushels of livestock products such as meat, eggs, butter, cheese, milk and cream.

Then there are consumed either directly or through livestock large amounts of beans, peas, lentils, rapeseed, ground nuts, linseed, sesame, cotton seed, hemp seed, coals, palm kernels, fish, game, vegetables, fruit and pasture grasses.

Or, it means that on the average each person in the world consumes annually the following: potatoes 4 bushels, wheat 2.8 bushels, rice 2.6 bushels, rye, millet and spelt 1 bushel, livestock products 1.1 bushels, fish, game and vegetables, fruits and other cereals 3 bushels, making a total of 14.5 bushels of foodstuffs each person consumes per annum, of which it will be noted that wheat forms one fifth.

Factors that have tended to raise prices have been: Poor prospects in Australia; Italy purchasing Argentine wheat heavily; serious lack of sub soil moisture in U.S.A. northwest and eastern Canada; price of gold advancing; Japanese wheat crop estimates lower; increase in Argentine flat acreage; sale of diamonds from South Africa increasing considerably.

Prices have been pushed down by: Beneficial rains in Argentina; large wheat exports from Balkans, Southern Hemisphere, India, Persia and Sweden; U.S. winter wheat crop very promising; Argentina further devalues currency; seasonable crop weather in Europe; exports of corn and pork from Rhodesia increasing.

The sunflower, which is cultivated in Canada mainly for feed for birds and poultry, for ensilage as cattle feed, and is an ornamental plant, is generally recognized as indigenous to North America. It was used as food by the North American Indians; the seeds being eaten raw, or pounded and mixed with other seeds into flat cakes which were dried in the sun. In 1615 Champlain found the Indians in the vicinity of Georgia Bay cultivating the sunflower. The oil which they obtained from seeds was used for their hair.

With him. He had hammered the stump, till his head did swim; he had looked for worms till his eyes were dim; he had punched each tree and knot and limb, and darn the bug there was for him. Not a song he sang, not a woodland hymn, for how can a bird with hunger grim, looking right in to the eyes of him, get up a voice like a cherubim, and with melody make the welkin sing? His crop was vain, and only a whiff, was in the stomach of him. When he flew to the river and drowned him, and never made an effort to swim. His last words were "Oh birdie trim, why did you vote for that hawk so grim, who got to work on each woodcock limb, and placed a note on the bug of him. I'm like the farmer grunt and grim, who gets surrounded by a rim of notes that fill him to the brim with wind till his throat is in the stomach of him." The woodpecker then was out of breath, and the fish that ate him starved to death.

SPORTLETS

(By Don Swain)

Jack Lyons, who put in a lot of hard work coaching the Gleichen rugby team, has accepted a position at Winnipeg and left for the Manitoba metropolis last week. The rugby team boys were all on hand to give Jack a good send-off, and incidentally made him a presentation of a shaving set by way of appreciation for the good work he put in.

Old Man Winter is with us again and rugby, as far as Gleichen is concerned is finished for the year. The local boys failed to win a game but they improved tremendously and Arrowwood had to admit that the last game in Gleichen was the toughest they played all fall. The boys will get started earlier next season and it is very likely that the story will be quite different then.

That down east sports commentator who supplied Liberty magazine with a rugby article about a month ago ought to be suffering from red ears at the present time. He picked Winnipeg to win again in the west, Regina was only fair and Calgary Bronks not worth nothing. Also Montreal Indians were to win in the east and beat Winnipeg in the play-off. Look at them now, both Montreal and Winnipeg are out of it altogether, Regina are favorites in the west, and the lowly Calgary Bronks still have something to say about which team will represent the west. This will be decided by the time this week's Call is printed. We hope to see Calgary win but it looks Regina from here.

Well, we notice that the local hockey crew are out limbering up once again. Thanks to a heavy rainy grind we now of two up and coming members of the team who will be right in the pink of condition to start the season.

This week's prize crack goes to Freddy Jones. It is a year since he perpetrated it but it is still worth while handing on. The scene was the sad procession of aging war veterans on their way to the cemetery to put poppy wreath on the graves of comrades who have gone ahead. Freddy looked round at the heroes and remarked: "Well, it won't be long now before you see me staggering up here on the 11th of November with about thirty wreaths."

Sailor Goodland ought to have been here to see Emil Lust beat Yorky Bentley he would have enjoyed it. We think the Sailor's belt will be holding up his pants for some little time yet, or anyway, it is going to be a better man than either Emil or Yorky who

U.F.W.A. INFORMED SALE PROVED VERY SUCCESSFUL

The U.F.W.A. held their meeting of November 5th, at the home of Mrs. J. W. Hutchison, (Mrs. P. Sammons acting as hostess) 22 members and visitors being present. Mrs. A. Buckley was in the chair. Reports from the tea and home cooking sale were read and everyone was pleased to hear that the results were very satisfactory.

Mrs. J. W. Hutchison read a bulletin on "Co-operative Efforts," and a reading course Mrs. A. Wilson was the winner for the raffled tea prize, it being a cake pitcher.

"White Elephant" was much enjoyed by the ladies after which the men joined in a dainty tea.

The next meeting will be held at the home of Mrs. A. Buckley on November 16th.

OBITUARY

MRS. G. A. SHAW

Mrs. G. A. Shaw, mother of Mrs. S. E. Dufce, died last Thursday at Birtle, Man., after a long illness, at the age of 82 years. The funeral took place Saturday. Mrs. Shaw lived in Gleichen for two years having been in 1918 to reside in Golden, B.C., later moving to Birtle. Her husband predeceased her in 1922. For the past three months Mrs. Dufce has been with her mother in Birtle.

Harry Brown, former manager of the Shopton Store here, spent a short time in town last Thursday.

will take it away from him.

The Gunners will either have to get a covered rink or else make some arrangements with the weather. The night of the fight card was bad to start with, and if hockey is going to be a repetition of the freeze-outs we got last winter we might as well throw up our hands.

Home Markets For Local Produce

Assuming that a statement appearing recently in the daily press is correct, it seems an anomaly that a country so well equipped in many sections to produce wool as Canada should have to import that commodity from other countries.

Yet such apparently is the fact if credence can be given to the published assertion of L. R. McGregor of Toronto, Assistant Trade Commissioner for Australia to Canada when he said in a recent interview that "Canada is Australia's third best wool customer."

Not only are the western provinces well suited to wool production, both on large scale on the ranches in southern areas of Saskatchewan and Alberta and in all three prairie provinces on smaller scale from farm flocks, but it is generally conceded by authorities that conditions in these provinces enable Western Canada to produce wool of quality equal to the best anywhere.

Time was, not much more than a decade ago, when a substantial percentage of Western Canadian fleeces were offered to the market in poor condition. The quality often was there but many of the fleeces were greasy, filled with burrs and generally speaking ill prepared for market requirements.

Since that time, however, producers have learned a great deal about the preparation of wool, and the standard of the product has been vastly improved, so much so, in fact, that an unkempt fleece in shipments for export from the prairies is a comparative rarity today.

That being the case, it can be asserted with confidence that Western Canada can produce sufficient quality wool for domestic requirements in addition to considerable quantities annually for export, and the producer is now complying with market requirements in the preparation of his product.

Why, then, should it be necessary for Canada to import wool from other countries such as Australia and the Argentine? In the light of the facts, that appears an unanswerable question.

Another anomalous factor in the Canadian wool industry is the fact that although Eastern Canadian woolen mills are equipped with machinery to produce tops (wool in a partly manufactured condition) the machines are standing idle while tops are being imported from Great Britain. The reason, it is explained, is because tops can be manufactured more cheaply in England than in Canada. This is a plausible explanation, though the situation is an unfortunate one for this country, when it is remembered that there are plenty of idle workmen still in the East.

The anomalous situation at the production end, however, is one which should lead to serious inquiries into the hope that the cause for a country like Canada importing wool can be discovered and, if feasible, rectified.

The statement made by the assistant trade commissioner for Australia engenders the thought that possibly there is room for considerable development of the domestic market for other Western Canadian agricultural products, and inspires the question whether everything that is possible is being done to ensure absorption of home products in local markets to the greatest possible extent. If other agricultural products are subjected to competition of similar imported commodities, it is a very unfortunate thing for the producers, and especially is this the case at a time when farmers are turning to greater diversification because they are forced to it by the European wheat situation.

Perhaps the solution to the problem of finding wider domestic markets for home grown products lies in the laboratory and this is a question worthy of investigation by farmer organizations, boards of trade and similar institutions and the governments.

There are men today working quietly in private laboratories seeking means to extract by-products from wheat and other agricultural products, of which Western Canada has a great abundance, capable of conversion into fuels, clothing and other necessities and there is no doubt there is great opportunity for more research work along these lines.

The work of some of these men leads to the belief that therein may lie at least a partial solution of some of the west's agricultural problems. It is stated, and not without authority, that the secret of the manufacture of some of these products lies in the use of the diagnostic X-ray pictures wrested from test tubes and retorts and other paraphernalia of chemical and electrical engineering laboratories, and that all that is needed to make them a marketable reality is the necessary capital. Where this is to be found for such projects is another question.

Thanks To Stamp Collectors

Heavy Purchases Flashed Trip Of Dirigible Around World

It was stamp collectors' heavy purchases of Hindenburg commemorative stamps that made the recent flight of the big dirigible to this country possible, Dr. Hugo Eckener told an audience of New York stamp collectors.

The famous designer said that seven flights were paid for only with the help of the stamp collectors and that they paid the whole expense of the famous trip around the world.

Explorers and pioneers in transportation of all sorts have a source of support in the stamp collectors of the world these days, and the collectors welcome the chance to share in the expense if it means a commemorative cover, suitably marked, for such a thing can never be duplicated, and is likely to increase in value. What a large few thousand stamp collectors would have been to Columbus! — Port Arthur News-Chronicle.

A water drop cannot rise above the level of the body of water of which it is a part, and the same rays draw it up or unless it is driven by mechanical power, as in a spraying fountain.

Cotton and artificial silk material are being made by a process that insures it against wrinkling.

Expert In X-Ray Work

People Over Heavy Debt To Skill Of A Woman

Every war veteran whose life was saved by X-ray location of a bullet in his body, every civilian whose hidden abscess beneath a tooth has been found by X-ray, owes a debt to the skill and devoted efforts of Elizabeth Fleischman Asheim. This woman, who has been called an American Joan of Arc, was not a physician but became interested in X-ray work through a doctor brother-in-law. She took a course in electrical science, bought X-ray apparatus and fluoroscope, rendered valuable aid to the Army during the Spanish-American War, and showed by the excellence of the diagnostic X-ray pictures she took how much X-rays could add to military surgery. After the war she saw the possibilities of X-rays in dental work and was busy with this for the few remaining years of her life.—Quebec Chronicle-Telegraph.

A music-hall magician opens his act by guaranteeing to tell the exact age of any lady in the audience. The remainder of his turn is quite popular, though.

Church is the only place you have to be early to get a back seat.

And the darkest hour is just before the dawn. 2189

Great Change Taking Place

Women Drifting Away From Kitchen Work Survey Shows

The average American woman is drifting further from her traditional place in the kitchen, according to a survey made by Quax, an honorary scientific fraternity for women at the University of Pittsburgh.

The scientific committee to their conclusions while studying professions encountered in a quest of employment. Their detailed survey represented an effort to clarify and classify the many-sided difficulties in job-seeking and their relationship with the university graduate.

Interviews, letters and telephone calls to and from a thousand personnel directors of business organizations and public institutions revealed that many positions are waiting for trained women.

Opportunities are available, it was found, in a wide variety of business, educational and scientific spheres. Almost every branch of city, state and federal departments indicated that women, especially those trained in science, are needed.

The many possibilities included almost every phase of activity except that centred by the kitchen. The fate of the family's meals, it was indicated, is facing highly uncertain times.

Extension Of Trade

Says Canada Should Co-operate With The Rest Of The World

Canada's aim should be greater trade with Great Britain, H. G. J. Ferguson told the Galt Kiwanis Club.

While advocating extension of trade, the former high commissioner to London said Canada can never follow a policy of isolation. Canada should co-operate with the rest of the world for its betterment and advancement. Britain has the greatest market in the world and the Dominion should capitalize to the fullest extent on this fact, he said.

The speaker predicted the Dominion would soon be a dominant trade nation once again and said the close connection between Canada and Great Britain has been an immense advantage. He paid tribute to the foresight and purpose of the fathers of confederation who were "not dreamers but practical builders."

Drouth Stricken Areas

To Expand Drouth Rehabilitation Work In The West

Under the impetus of extension of drouth-stricken areas in Western Canada the Dominion government has decided to expand its drouth-rehabilitation work in the west.

Hon. J. G. Gardiner, minister of agriculture, said financial assistance would be given farmers in the digging of "dugouts" or reservoirs of water for stock. This decision means assistance will now be given to all water conservation projects.

The basis of assistance to drouth is three cents per cubic yard of dirt moved up to a maximum of \$50. In all cases the government provides engineering advice and all assisted projects must be approved by engineers.

Assistance on the same basis is provided for the construction of small dams.

Great Difference In Weight

Small And Large Parcels Sent Recently By Air Freight

Contrast in United States air freight traffic was shown the other day when a parcel weighing only two ounces and another weighing 200 pounds were transported.

The two-ounce package was a single false tooth the owner had left behind in a hotel bedroom, afterwards wirelessly an urgent message to have his forgotten "filler" rushed to him. A mining machine crankshaft made up the 200-pound "parcel."

Another strange consignment was sent by a surgeon in Mexico. It was a tiny piece of living tissue and was rushed to New York for analysis. Laboratory workers carried out their tests and results were telegraphed to the surgeon.

Coronation Plans

Duke Of York Heads Committee In Charge Of Arrangements

The Duke of York will head the committee in charge of plans for the coronation next May 12, The London Gazette announced.

The committee includes Prime Minister Baldwin, the Archbishop of Canterbury and York, Chancellor of the Exchequer Neville Chamberlain, the Earl of Athlone, Sir Samuel Hoare, David Lloyd George, Winston Churchill and Sir Austen Chamberlain.

Tragedy In Northern Seas

Russian Scientists Succumb To Cold And Hardships

Twenty-year-old Ian Kruckhoff related the story of a grim voyage through the wild and icy waters of the White sea with a cargo of 10 dead men.

Kruckhoff was the lone survivor of a party of 12, all members of a scientific expedition. He reached safety in a lifeboat loaded with the bodies of 10 of the others. The 11th was never recovered.

The 12, headed by the hydrographer, G. Bardinoff, left the expedition's steamer *Toros* on June 27 in a small boat to make a study of the depth of the sea between Archangel and Kowdusha bay, on a route crossing the Arctic circle.

"After three days' work," said the youth, "we decided to return to the ship."

"We were caught by a storm. Mountainous waves capized the boat and swept away the oars, equipment and our comrade Nikolai Pedesoyeff, whom we never saw again. Struggling in the water, the rest of us with great difficulty managed to right the boat and climb in."

"Then for a day and a night we were the prey of a furious sea. "We had no oars: we tried frantically to row with our hands. The boat constantly shipped water. We scooped it out with our hands and our caps. It was horribly cold. One after another, my companions died of exposure and exhaustion until I was left alone with 10 bodies."

"The sea grew rougher, and it was only by tying my right wrist to the carlock that I was able to stick to the boat."

From Siam To Surrey

Ex-King Pradjahpuk Settled Down In England

Ex-King Pradjahpuk of Siam has just moved into his new home, on which he spent \$100,000 in improvements, in Surrey, England. It is a red brick house, standing in 15 acres of gardens, and it has a reception room, 12 bedrooms and six bathrooms. Every one of the rooms has been specially designed and furnished. The dining-room is in early Queen Anne style, the drawing-room in late Queen Anne. The other rooms are more modern. A motion picture theatre has also been built in which the family entertains visitors. Pradjahpuk buys the latest talking films, and favors American gangster pictures.

SELECTED RECIPES

BANANA CAKE

1/2 cup butter
1 cup white sugar
2 eggs
4 tablespoons sour milk
1 teaspoon soda
1 1/2 cups Furity Flour
2 teaspoons baking powder
3/4 teaspoon salt
1 teaspoon vanilla
1 cup mashed bananas

Method: 1. Cream butter; add sugar. 2. Add well-beaten eggs. 3. Add bananas and vanilla; beat well. 4. Dissolve soda in milk. 5. Sift flour with baking powder and salt and add, alternately, with milk to mixture No. 3. 6. Bake in loaf tin 50 minutes in moderate oven of 350 degrees.

Emigrant (Writing back home) "And all the way across the long train journey was so tiresome that one man kept shouting at every stop 'Bored', 'Bored'. We were too—but we didn't say nothing."

Tall men live longer than short men, thin men longer than fat, married men longer than bachelors, and vegetarians longer than carnivorous men, according to statistics.

The word rosary is derived from the Latin rosarium, which was originally a garland of roses and used to crown the image of the Virgin Mary.

House Flies Breed In Garbage

Dangerous Disease Carriers Menace To Public Health

For many years public health efforts have reduced the scourge of typhoid fever and many other dangerous, contagious diseases by government enforced legislation in respect to the inspection of cattle, milk-pasteurization, the chemical purification of suspected water supplies, and the elimination of many other known breeding sources of disease. But little has been done officially about the common housefly. Each summer it infests the land wherever mankind exists. It is borne and bred in rotten animal or vegetable matter, lives on filth and refuse. It carries germs of infectious diseases into the home endangering the health of everyone, from the defenceless baby in its crib to the elders of the house who relish the tasty salad, upon which a fly may have recently been feasting and spreading disease germs that have accumulated on its hairy legs.

Public spirited citizens should fully realize the seriousness of this menace and take measures to check it. Searching out hidden unsanitary breeding places, keeping homes well screened and foods covered at all times are important. But the quickest and simplest method of killing all flies is to place a few saucers of Wilson's Fly Fads around the house. They will attract the flies and kill them all in a few hours.

The Court Of Claims

Begins Its Sittings After Coronation Date Is Set

After the Coronation date is set, the strangest Court in the world begins its sittings in London. The Coronation proclamation set up the Court of Claims. It considers pedigrees and hereditary rights to serve the King in person.

Some claims which have come before the Court are:

To support the King to the altar.
To carry the Great Spurs (part of the Coronation regalia).
To drink the King's wine as a guard against poisoners.

To have the bed which the King sleeps on the night before he is crowned.
Three claims which are likely to be allowed are those of:
The Earl of Shrewsbury, as Lord High Steward of Ireland, to carry a white wand as symbol of his office.
The Baron of the Cinque Ports to hold a canopy over the King's head at the Abbey.
The Lord of the Manor of Work-sop to present to the King a pair of fine gloves.

Plan Crime Hospital

Scheme Is Suggested By Several Prominent British Physicians

A movement to found a "crime hospital" where criminals may be sent for psychological treatment instead of being imprisoned, has been launched by Lord Dawson of Penn and several other prominent British physicians and psychologists. Officials of the home office are said to be in sympathy with the scheme, which they believe may lead to revolutionary changes in the state's attitude on crime. An appeal for \$50,000, with which to build a clinic in London, is being made.

Plan Huge Liner

New Vessel To Be Longer And Larger Than The Queen Mary

Preparations for constructing a bigger and faster companion to the S.S. Queen Mary were begun tentatively on the Clydebank. In shipping circles it was said the liner, if constructed, would probably be christened the King George V.

An official order for the construction of the liner was issued. It was suggested the projected liner would have a tonnage of about \$5,000 as compared to the 80,773 of the Queen Mary.

An official of the John Brown Company which built the Queen Mary for the Cunard-White Star Line said: "We are almost certain to be given a tender although we have not received an official confirmation of the order."

The company had expected to receive an order for a battleship, but it was understood the admiralty would be spread instead to other shipbuilders in North England to help the John Brown Company free for the liner.

Cunard-White Star officials have been inspecting models of the proposed liner while experts have produced altered and refined engine designs.

A Brown official said, "The new ship will be larger than the Queen Mary and faster."

It was understood that present plans call for a longer ship with greater passenger accommodations. The ship, it was said, would probably be placed in commission in 1938.

The Left Turn

Care Should Be Exercised In Making Turn At Road Intersections

A well known writer has estimated that a large proportion of auto accidents are caused by neglect of drivers to observe ordinary care in making the left turn at street and road intersections. The following points are noted:

If you desire to turn to the left do not approach the intersection on the extreme right of the street or highway but keep close to the centre of the road. If you approach on the extreme right you may turn to the left just as another car is coming up on your left.

Do not turn to the left close to the centre of the intersection but continue across the intersection until you are almost directly opposite the right side of the intersecting road or street, then turn to the left. If you turn to the left at the centre of the intersection you are in danger of meeting, head on, a car coming up from your left.

Be sure to give the proper signal a reasonable time before you come to the intersection so that cars coming from behind are prepared for what you intend to do.

Even if the road or street is not marked with a strip up the centre, there are two imaginary strips on every road of street—the right and the left. On every right or left strip there are one, two or even three lanes. Keep on your own strip and in your own lane is the best advice possible to avoid accident.

Old tramcar bodies, discarded in favor of trolley-buses in various parts of London, can be bought at the depot for \$10 each; carting them away is the real expense.

If we could all do as we please who would wash the dishes?

Town & District

Jack Moss, former Gunner manager, but now living in Vegreville, has been appointed to the executive of the A.A.H.A. for the northern zone. Thus every year Jack keeps in the fore front of hockey.

The annual meeting of the Meadowbrook Community Hall Association will take place on the evening of Nov. 24th in the hall. After the business has been finished a social evening will be spent.

During the cold spell last week a lot of ice was made at the arena. If the cold weather had lasted a couple of days more the job would have been completed.

The Order of Eastern Star are holding a Bridge and Whist Drive, Friday, Nov. 13, at Masonic Hall. Admission 25c.

GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, minister.
Mrs. H. Bird, choir leader.
Miss Jean Paquette, pianist.
11 a.m. Church School.
7:30 p.m. Devine Worship. There will be talk to the girls and boys about the little fox that is easily discouraged.

Sermon topic: "The finding of a Great Treasure." The sermon will deal with the Bible, the most wonderful book that has ever been written. In spite of all the attempts that have been made to destroy it the Bible is still the largest seller of any book on the market. If men and women in Canada appreciated all that the Bible has meant in the life of the nation they would probably treasure it more and make better use of it as well as share it with others who would be glad to use it if they had the opportunity.

The representatives of the Bible Society will be making their annual canvas in a few days and it is hoped they will find a hearty response to their appeal for the work of the Society.

IN MEMORY OF BILLY TREACY

W. R. Treend who at one time had a cattle ranch north-east of Gleichen, but now living in Glendale, Calif., has written The Call enclosing the poem below in memory of his grandson Billy Treacy. Mr. Treend used to

make Gleichen his headquarters and will be remembered by all old timers in the town and district.

In Memory of Billy Treacy, By Grandpa

In the midst of life we are in death
Was proven to us by wire to-day,
When we heard of the fatal accident
That carried Billy Treacy's life away.
He was born and raised on the western plains
And he loved to ride his bronchos high,
But he took that ride in an automobile,
Now he is riding a chariot in the sky.

All our hearts go out to that mother of his
Who loved him so faithfully for twenty-two years,
And when we think of her in her agony now
Our eyes brim over with sorrowful tears.
He was faithful and true with his work on the range,
He was made of that stuff that has built up the West,
He was fearless of blizzard, of snow and hard frosts,
In his sports or his work he did always his best.

His Grandpa, although he has eight grandsons left,
Always thought Billy Treacy was one of the best.

He was the first one to come and the first one to go,
He was named after me, and I'm glad it was so.
Don't do as I do but try and do as I say.

There is no use to mourn because God took him away,
He is better off there where the fields are more green

Than ever those plains of Alberta have been.

He was tender in years, but he never knew pain,
It would be wrong if we wanted him back here again.
When we look back at his life, he never did much that was wrong,
Now we know he has gone to join the white throng.
No more will he want his long boots or his saddle,
For the trails over there will be easy to travel.
He will just float around and look over the herd,
And take on his night shift without ever a word.

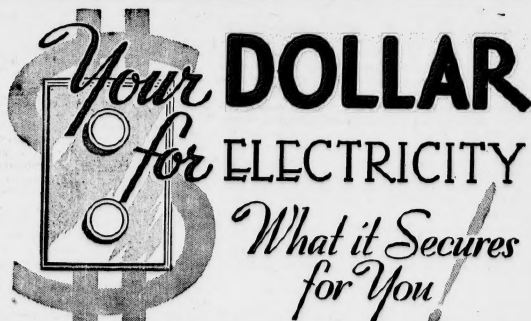

He leaves to mourn him his mother and father and I
His brothers and sisters to the number of seven,
Four cousins that are all much younger than he
I wonder how soon we'll all meet him in Heaven.

Three uncles and aunts are mourning him like a sorrowful crew,
His grandpa is the only one too far away.
There's not much I can do, but I'm sure I will pray.

His Daddy will miss him, we all feel quite sure,
Though in silence he suffers his grief and his wee

It was for Billy he started that ranch over there,
And it breaks his heart now that he had to go.

But there must must be a ranch up there in the sk
Where Billy and Will Rogers will be riding in high,
And if we are faithful as they, till we die,
We'll all join the big round-up in the sweet bye and bye.

YOU SNAP A SWITCH! Instantly you commence to enjoy an abundance of light, or the quick, clean and convenient operation of your electrical appliances. Behind the switch, however, are the dams, generating plants, substations, and widespread transmission and distributing systems provided by your Power Company, to produce electricity and bring it to you.

Also behind the switch are the necessary services of highly trained engineers, technicians and skilled workmen to plan improvements and extensions . . . to install and maintain equipment.

Further than that, the technical service of your Power Company's engineering staff is available to all consumers to assist them in securing the greatest possible value from the electricity used.

Your Dollar for Electricity does not purchase just so much electricity. It contributes to maintaining the equipment necessary for generating and delivering that electricity . . . and for maintaining the facilities and organization required so that despite gales, sleet, lightning and every other possible trouble your electrical service will be continuous, dependable, convenient and economical.
